symbols in a drawing by simply dragging the symbol where you want it. (video: 1:25 min.) Smart Guides: Manage and use multiple data labels for reference. When you display a label, the label will automatically snap to the nearest data in the drawing. Quickly and easily add, change, or delete labels (video: 1:25 min.) Constant Value Display: Quickly find a single value. Constant Value Display allows

---

you to quickly see the value of a line, area, curve, or text in your drawing. This value can be a number, text, color, or any combination (video: 1:44 min.)

Power-point Integration:

Integrate Power-point with AutoCAD and AutoCAD LT by creating RIBs, adding ribbons, and creating PowerPoint hyperlinks. Create custom annotations, ribbons, task panes, and more. Create PowerPoint hyperlinks by adding

---

a shortcut to a page or by creating an association with a ribbon. Easily send your presentations to your browser as PDF, PowerPoint, or other file types (video: 1:33 min.)

Roadmap View: Plan your work using Roadmap View. Locate all the objects, features, and annotations in your drawing, whether you are looking at a single component or the entire model. Click on the Roadmap icon to see an overview of your

---

entire project (video: 1:39 min.)

**AutoCenter:** Turn any drawing area into an automatic measure point, so you can measure components within any area of a drawing.

**AutoText:** Use AutoText to automatically add text labels to a symbol, and specify where the text should appear. AutoText also allows you to convert simple geometric shapes into text.

**3D Shortcuts:** Save time by using predefined controls and shortcuts, so you

---

can focus on modeling, not configuration. Create a saved template for most 3D modeling commands, such as the ribbon menu. Sketch Mode: Draw a quick sketch with AutoCAD. Just press the Sketch icon in your toolbar and create a sketch using any shape, line, arc, or arc tool. Your sketch will immediately disappear, and you can continue to add components to your model.
