In 1995, a product was introduced which allowed working with multiple documents at once, which was called Multiple Document Interface (MDI) and later Multi-Document Interface (MDI). It was later known as the Multiple Document Interface (MDI) pane. In 1996, to meet the needs of the users, the object-based 2D graphic interface was introduced, called the Graphical User Interface (GUI). In 1997, to adapt to the changing needs of the users, the object-based 3D graphic interface was introduced, called the Graphical User Interface (GUI). In 1999, a parallel project was initiated in cooperation with the University of Michigan and the University of Michigan Technological Institute, resulting in a new graphics system named Viewpoint. In 1999, AutoCAD was named a 20th anniversary product. In 2000, a Windows-based operating system was introduced.
