## ICapture Desktop Crack+ [32|64bit]

IntrospeQt iCapture Desktop is an out-of-the-box document capture solution designed to simplify your document capture process. Overview It can be leveraged as a stand-alone document capture solution or act as a front-end capture solution for your existing document management application. It follows a comprehensive document capture workflow that can be easily configured to meet your specific business needs. From source to storage, it offers options to handle ad hoc to complex batch scan, manual to automatic sort and index, and simple to advanced search features. It is quick to install and easy to operate. It offers configurable scanning profiles, scanning modes, document recognition modes, and the scanning area can be easily adjusted. Its document capture workflow consists of four simple steps: 1) Source Documents are input into the system from your scanner, the scanner has been integrated into the desktop to allow users to scan, crop and index documents right on the desktop. To view and retrieve documents, users open the iCapture tool window and click on the scanning profile they want to use. 2) Capture Once a document is input into the system it will be automatically saved in the Capture directory, as determined by the settings for the scanning profile that you have selected. 3) Storage All processed files are automatically saved to the iCapture Storage system, currently version 3. 4) Search Once documents are stored in the iCapture Storage system they can be searched using the advanced search and retrieval features, this allows for easy retrieval of documents that may not have been stored in the destination location at the time they were captured. Download the 14.2.0 release iCapture Desktop can be downloaded for free. The 14.2.0 release contains no new or changed features.
