common meaning? ===== tlow As a former physics student, I knew exactly what the author meant. Add in the fact that he already pointed out the philosophical nature of the question and you get to my interpretation of what the author was trying to say. In physics, we are generally taught to think of the physical universe as consisting of particles and fields. Physics, at least my physics and computer science physics classes, works with these concepts. Adding too many other aspects of our world has the potential to confuse us about what we are actually learning. In the context of the discussion, I would suggest the author was saying that "doing good" is a useful definition of "life", and also noting that there are many fields of study that one could pursue which are often labeled as "life" when applied to other areas of "doing good", i.e. people working with non- profits and homeless shelters, and doctors and scientists. The author also made a good point about the ambiguity of the word "life". I like this discussion as it highlights how many ideas we have had in our time, and how little we actually know about what our universe is. Philosophies of what we don't know are just as interesting and important. Experimental analysis of the colour-blindness gene in mice: measurements of
