the officers left the premises, and they never returned. powell was arrested, and a search of his house and books revealed that he had authored several other anarchist cookbooks and had a history of involvement with activist groups like the weather underground. he was also known to have purchased items such as black clothing and steel-toed boots. i was always a political anarchist. my whole life i have been fighting for the idea of a communist society where people live in a society where we are all equal and no one has special privilege because of their status. i did not have an easy childhood. as a kid, i was beaten up by the cops and had to go to jail for a number of days. in school, i was always in trouble. i was always the bad kid. i was always getting in trouble for fighting and throwing rocks and shit at people and getting into fights with the school bullies. i was always getting kicked out of school. rather than thinking of anarchism as a political ideology, it might be more useful to think of it as a set of practical practices. a festival organized around anarchist practices would attract people who share a set of common activities that they enjoy together. we can recognize the enjoyment of these practices as a good in itself, regardless of any political associations they may have. we might think of anarchism as a form of fun. for the festival to be successful, it would need to avoid attracting a predominantly working-class audience. people with different lifestyles and responsibilities would not enjoy an anarchist festival as much as working-class people. working-class people are more likely to have a lot of free time and free money than people who work. but we should be careful not to view anarchists as working-class people who happen to be anarchists. we should instead think of anarchists as people who have a lot of free time and free money. this is the basis of fun, after all.
