As long as you don't try exporting the image from Lightroom and open it in Photoshop, any changes you make won't affect Lightroom. In this version, the original PSD remains intact. However, images created with Lightroom 5 can be opened in Photoshop and the changes made there will be reflected on the PSD that remains intact outside of Lightroom. Since I'm not using Lightroom for printing, I really don't care whether many of my customers feel it's important that I retain the original PSD. What I do like is that I can open and edit photos in Lightroom, then export the images to my new iMac rather than having to constantly move files back and forth. It's initially appealing to me at first, and not just because I am one of those people who could use a bit of a refresher with the file list. There really is no better way to improve image quality that is immediately backed by a supply of talented professional photographers. This is excellent news for content managers who enjoy looking up their own work and seeing what other photographers' areas of expertise are before deciding whether to use them or not. If the frames are white, it will mean it's been captured in its entirety. If a black frame is used, it indicates that it's captured from the bottom of the screen. If you're having trouble deciding how to start your design process, check out these helpful tips for the best quick, easy steps to get your creative juices flowing.

- Start with a sketch—basically a rough thumbnail of your design. If you are unsure about how to sketch, try using an informative article or blog to illustrate your idea. Sketch is a great way to start your design process because it takes the guess work out of being unsure of what you want to use. Without a sketch, you may end up adding too many lines, which could muddle your basic idea, or lead to potential problems.
- Choose a typeface—like you would for any other design project. Selecting the right typeface for your project is an essential step in any design project. Google a list of potential typefaces for your design project and use what you find.
- Create a style guide—this simple guide helps you organize your work and keep everything consistent throughout your design project. Use a sticky note to write down any abbreviations or important words in your design project that catch your eye.
